**What is the market share of
Huawei s 5G communication
base station inverters in China**

Overview

Who makes 5G in China?

A paid subscription is required for full access. As of 2023, 58 percent of all 5G base stations in China had been manufactured by Huawei. Its closest competitor was ZTE with a market share of 31 percent. Both telecom manufacturers have maintained a similar market share throughout all bidding rounds since 2020.

What is the global 5G base station market report?

The global 5G Base Station market report is a comprehensive analysis of the industry, market, and key players. The report has covered the market by demand and supply-side by segments. The global 5G Base Station report also provides trends by market segments, technology, and investment with a competitive landscape.

How many 5G base stations are there in China?

The market is witnessing significant developments in base station technology and deployment strategies. By September 2023, China had built 3.189 million 5G base stations, with 22.6 5G stations per 10,000 people, demonstrating the scale of infrastructure deployment possible.

Which 5G base station segment has the largest market share in 2022?

According to the 5G base station industry analysis, the small cells segment accounted for the largest market share in 2022. Small cells are low-powered radio access nodes that operate in licensed and unlicensed spectrum bands.

Which segment accounted for the largest 5G base station revenue?

In terms of 5G base station revenue, the macro segment accounted for the largest market share, as macro cells are key components of radio communication systems, which have a very significant radio range for the cellular network. It is a wireless base station that transmits and receives radio

signals through large towers and antennas.

What is 5G base station segmentation?

The 5G base station segmentation, based on type, includes macro and small. In terms of 5G base station revenue, the macro segment accounted for the largest market share, as macro cells are key components of radio communication systems, which have a very significant radio range for the cellular network.

What is the market share of Huawei s 5G communication base station

Base Station Antenna Market Size, Share & Growth [2032]

The global base station antenna market size is projected to grow from \$12.48 billion in 2025 to \$36.13 billion by 2032, exhibiting a CAGR of 16.4%
