What is the size of an outdoor power supply in Botswana

Overview

How much electricity does Botswana need?

The average electricity demand for Botswana is at 850 megawatts (MW), against a generation capacity of 893 MW. Demand of electricity is projected to grow to over 1200 MW by 2030. Additional energy is imported from South Africa. Botswana generates 48% of its power and imports 52% from the Southern African Power Pool (SAPP).

Why does Botswana need a secure electricity supply?

There is a need to improve the security of power supply to support higher productivity. The country's national electricity access rate increased from 62.6% in 2017 to 81.5% in 2020, in line with Vision 2036 that targets universal access by 2030. The average electricity demand for Botswana is at 850 megawatts (MW), against a generation capacity of 893 MW.

Where does Botswana's electricity come from?

Prior to this period, most of Botswana's electricity was imported from South Africa's power utility, Eskom. In 2008 South Africa's electricity demand started to exceed its supply, resulting in the South African government restricting power exports.

How does the electricity sector work in Botswana?

The sector combines the local generation and imported electricity to come up with electricity that is available for distribution in Botswana. This does not take into account electricity used for auxiliary services, pumping, network losses as well as the production of electricity through incineration of waste.

Is biomass a source of electricity in Botswana?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Botswana: How much of the country's electricity comes from nuclear

power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

What is the production capacity of Morupule Power a plant?

The Morupule Power A plant of capacity 132 MWH was augmented with the construction of Morupule Power B plant having production capacity of 600 MWH (BPC Annual Report, 2010). The Index of Electricity Generation is a Laspeyres index. The weighted average for electricity generation equals one because there are no various electricity products.
