

SolarInvert Energy Solutions

What kind of battery does the base station use

Overview

It combines a high-capacity lithium iron battery with intelligent software to optimize energy use. The Base battery system has three main components: the battery pack, inverter, and hub. The long white unit is the battery pack. We mount the battery pack on the ground. What type of batteries does the base station use?

Your SimpliSafe Base Station is fitted with NiMH rechargeable batteries, which are constantly recharging as long as the Base Station is plugged in. The base station model is SSBS3.

How do you replace a battery in a base station?

To replace batteries in a SimpliSafe base station, rotate the base counterclockwise (CCW) to remove it, then remove the batteries and replace them while ensuring the (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.

What batteries do I need to replace my SimpliSafe base station?

To replace the batteries in your SimpliSafe base station, you need QTY (4) AA nickel-metal hydride (NiMH) rechargeable batteries. Do not use Alkaline or any other non-NiMH batteries. The batteries supplied from SimpliSafe are rated at 1000mAh capacity (very low).

What is a base battery system?

The Base battery system is built for performance and reliability. It combines a high-capacity lithium iron battery with intelligent software to optimize energy use. The Base battery system has three main components: the battery pack, inverter, and hub. The long white unit is the battery pack. We mount the battery pack on the ground.

What type of batteries should I use?

The batteries supplied from SimpliSafe are rated at 1000mAh capacity (very

low). Do not use Alkaline or any other non-NiMH batteries. If we are away, these high capacity batteries will provide much longer operation of the base station in the event of a power failure.

What is the battery capacity of the SimpliSafe base station?

The batteries supplied from SimpliSafe are rated at 1000mAh capacity.
