# What s inside the base station power cabinet

## Overview

---

What is a base station power cabinet?

The base station power cabinet is a key equipment ensuring continuous power supply to base station devices, with LLVD (Load Low Voltage Disconnect) and BLVD (Battery Low Voltage Disconnect) being two important protection mechanisms in the power cabinet.

Why are base stations important?

In modern communication networks, base stations, as core infrastructure, are crucial for stable operation.

Are RBS 6000 base stations multi-standard?

Multi-standard: All RBS 6000 base stations support multiple radio technologies. The RBS 6201 is an indoor macro base station that is part of the next-generation, multi-standard RBS 6000 family that also includes two outdoor macro base stations, micro base station a main-remote configuration and several Remote Radio Units (RRU).
