How to choose a power inverter?

Wattage rating: This might be the most important factor when it comes to buying a power inverter. All it takes is some simple math to know if an inverter can handle what you want to plug in. Multiply the voltage (5 volts for USB, 12 volts for cigarette lighter, and 120 volts for an AC) by the amperage of your device to get the wattage.

What volts does a 12 volt inverter output?

It depends on the wattage rating of said power inverter, but typical devices include phone and laptop chargers, small televisions, and gaming systems.
