✓ 19 INCH

Overview

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

Why is Mozambique a good place to invest in solar energy?

Additionally, Mozambique enjoys high solar irradiance and wind speeds, making it ideal for solar and wind energy projects. Current projects include the Mphanda Nkuwa Dam and several solar power initiatives aimed at increasing energy access in rural areas.

Why is Mozambique a major energy exporter?

Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) – South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.

Why is Mozambique's energy sector at a crossroads?

Mozambique's energy sector is poised at a crossroads, rich in resources yet challenged by infrastructural and governance obstacles. The sector is vital for the nation's economic development and social well-being, promising transformative impacts if harnessed effectively.

How much power does Mozambique have?

The country's biggest power plant, Cahora Bassa hydro plant, has an installed capacity of 2,075 MW. Currently, over 75% of the electricity generated from the hydropower plant is exported to South Africa. The remaining capacity, around 1,300 MW, is utilised to meet local electricity demand in Mozambique.

Why is Mozambique focusing on hydropower projects?

Since Mozambique has high hydro power potential, the country is focusing on developing large hydro projects that aim to be operational at the beginning of 2030's. Hydropower projects play an important role in decarbonizing the power sector in Mozambique.
