Which is better El Salvador 5G base station or communication

Overview

Why is Salvador launching a 5G network?

“Our new 5G-ready network is a true reflection of the confidence we have in the country’s future and the desire to provide Salvadorans with access to state-of-the-art services” said Del Cid. “Access to this type of technology is a platform to rapidly boost the competitive capacity of the country’s productive sector.

Why is Movistar launching a 5G network in El Salvador?

Movistar is aiming to extend the 5G network to 95% of El Salvador’s population. “Our new 5G-ready network is a true reflection of the confidence we have in the country’s future and the desire to provide Salvadorans with access to state-of-the-art services” said Del Cid.

Is Telefonica Moviles launching a 5G network in El Salvador?

Telefonica Moviles (Movistar) has commenced its rollout of a 5G-ready network in El Salvador. According to InformaTVX, the operator’s CEO Luis Del Cid pledged an initial investment of around US\$280 million. The deployment will continue into 2023, with commercial services scheduled to launch as the necessary spectrum is freed up.

Which countries offer 4G LTE services in El Salvador?

The mobile network covers 93 percent of the territory and 92 percent of the population, with 4G LTE services being introduced in 2019 after the allocation of suitable spectrum by SIGET. Today, América Móvil, Grupo IBW, General International Telecom Limited, and Tigo El Salvador offer high-speed data and internet services.

Why is mobile penetration so high in El Salvador?

Mobile penetration is remarkably high considering El Salvador’s economic indicators, higher than the average for Latin America and the Caribbean. The

growth in fixed-line services lowered in the face of mobile-cellular competition; fixed lines were 862,717 in 2022.

Does El Salvador have a mobile network?

By 2018, over 680,000 subscribers had used this service. The telecom penetration rate in El Salvador is approximately 153 percent, indicating a high number of mobile phones relative to the population. By the first quarter of 2016, 82 percent of the country's territory had access to mobile network coverage, mainly in urban areas.
