

SolarInvert Energy Solutions

Wholesale of photovoltaic folding containers at Indian construction sites

Overview

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Are solar containers scalable?

With paralleling capabilities with other energy sources, these solar containers become a scalable solution. Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

Are ZSC mobile solar containers a microgrid solution?

Hybrid performance with a generator or an Energy Storage System makes the ZSC mobile solar containers as part of a microgrid solution. With paralleling capabilities with other energy sources, these solar containers become a scalable solution. Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission.

Why do petroleum companies use mobile solar containers?

Petroleum companies often operate in distant locations with limited access to grid power. This is where a mobile solar containers can act as an additional power source to run the equipment. Good choice for disaster reliefs whenever

it is important to deliver electricity as quickly as possible.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
