

## SolarInvert Energy Solutions

# Wind power energy storage project in Italy

## Overview

---

What is Italy's wind energy sector?

To learn more about Italy's wind energy sector, please review their chapter in the IEA Wind TCP 2022 Annual Report. Total wind power capacity is 11,500 MW. Wind power capacity in Italy increased by 460 MW in 2022. Italy produces 20.4 TWh from wind energy, which accounts for 6.4% of the country's electricity consumption.

Where is the largest wind power plant in Italy?

The largest part of wind capacity is located in the South of Italy (97%). The production of a large amount of plants accessing incentives from 2013 was analyzed (over 3.900 plants and 1,8 GW). Plants with at least one full year of production between 2014 and 2018 were considered 553.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having a capacity of less than 20 kWh.

Is there a need for energy storage solutions in Italy?

Local industry contacts, as well as U.S. sector firms, have also indicated to Post that there is a need for energy storage solutions in Italy.
