## Overview

---

Zambia launches Choma Solar, a 60 MW plant with 20 MWh batteries to stabilize its rural grid, cut outages, and support the country's green energy transition. How much does a solar battery cost in Zambia?

Africa Clean Energy Technical Assistance Facility. (2022). Customs Handbook for Solar PV Products in Zambia. Bloomberg New Energy Finance. (2022, December 6). Lithium-ion Battery Pack Prices Rise for First Time to an Average of \$151/kWh.

Will Zambia increase its solar power capacity by 2030?

The Zambian government has set a target to increase its installed solar and wind capacity to 600 MW by 2030. However, the current installed capacity for solar photovoltaics is only 90 MWp, indicating significant underutilisation of Zambia's potential in the renewable energy sector.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector, Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain, including project development and financing, equipment manufacturing, system integration and contracting.

What companies trade in electricity in Zambia?

Private companies also trade in electricity in Zambia. The largest of these, Copperbelt Energy Corporation Plc (CEC), buys electricity primarily from ZESCO and sells it to the various mines in the Copperbelt Province. It also operates its own generators, most of which run on fossil fuels.

What is PV production & how does it work in Zambia?

In that case, the PV production is used to reduce the electricity bill and/ or the diesel fuel bill. As of 2022, the cost of diesel in Zambia was around USD

1.5/litre (Global Petrol Prices, sd) and the efficiency of a generator varies between 25% and 35% if operated at at least 30% of its capacity (Skylas-Kazacos, 2012).

What does the Electricity Act do in Zambia?

The Electricity Act regulates the generation, trans-mission, distribution and supply of electricity to enhance the security and reliability of electricity supply in Zambia. It codifies the rules on tariff setting and introduces the concept of intermediary power trading, a concept that was missing from the previous regulatory framework.
