

SolarInvert Energy Solutions

Zambia Flow Battery Project

Overview

Why should Zambia invest in rechargeable batteries?

The surge in demand for rechargeable batteries, driven by smartphone usage and renewable energy storage needs presents vast opportunities for Zambia and the continent to propel development anchored on the clean energy transition.

What is the US-Zambia-DRC agreement on EV batteries production?

The U.S.-Zambia-DRC Agreement on EV Batteries Production: What Comes Next?

The United States, Zambia, and the Democratic Republic of Congo (DRC) signed a memorandum of understanding (MOU) on the electric vehicle (EV) batteries industries in December 2022.

How will precursor production benefit the DRC and Zambia?

People in the DRC and Zambia could benefit greatly from precursor production in their countries, particularly if the associated energy and transport infrastructure is leveraged for wider use. However, government efforts in other policy areas will be at least as important.

What does the joint initiative mean for Zambia & DRC?

She indicated that, “Zambia and DRC are home to at least 70 percent of minerals required to actualise this vision. The Joint Initiative aims to utilise the mineral complementarities to enable the two countries to unlock economic opportunities and strengthen the value chain to produce battery precursors and batteries for electric cars”.

Can China influence cobalt production in the DRC and Zambia?

China’s dominance of cobalt production in the DRC and Zambia, including through state-owned companies, means it could have a significant influence

on the precursor plant, but its role is uncertain. Congolese and Zambian civil society actors are concerned about the lack of information and limited stakeholder consultation.

Will Zambia meet its own nickel production needs?

First Quantum's large nickel mine, Enterprise, started production in Zambia this year, which will add a massive 30,000 t a year on average. Nevertheless, this volume may still be insufficient for Zambia to meet the precursor plant's needs on its own even if refining facilities were constructed and all production was supplied to the plant.

Zambia Flow Battery Project

World's largest vanadium flow battery in China ...

Rongke Power has completed a 175MW/700MWh vanadium redox flow battery project in China, the largest of its type in the world.
