

## SolarInvert Energy Solutions

# Zimbabwe Wuxu Street is making lithium battery packs

## Overview

---

Does Zimbabwe export lithium concentrate?

Yes, Zimbabwe currently permits the export of lithium concentrate (an intermediate product) following its December 2022 ban on raw lithium ore exports. This intermediate processing stage will continue until the 2027 ban takes effect. How significant is Zimbabwe's lithium production globally?

.

What is Zimbabwe's new lithium export policy?

This two-stage approach—first banning raw ore exports in 2022, and now scheduling a concentrate export ban for 2027—demonstrates Zimbabwe's methodical progression toward becoming a producer of higher-value lithium products rather than merely supplying raw materials.

Will Zimbabwe reshape the global battery supply chain?

Zimbabwe's government has made a strategic policy shift that will reshape the nation's role in the global battery supply chain. Starting January 2027, the country will implement a comprehensive ban on lithium concentrate exports—a move that follows its December 2022 ban on unprocessed lithium ore exports.

Will Zimbabwe ban lithium concentrate in 2022?

The forthcoming ban represents a significant evolution in Zimbabwe's mineral resource strategy. Between 2022 and 2026, mining companies can continue exporting lithium concentrate (an intermediate product created after initial processing).

How much lithium does Zimbabwe produce in 2024?

Zimbabwe produced 22,000 metric tons of lithium in 2024, representing nearly 50% growth year-over-year. The country ranks among the top 10 global

producers and is Africa's largest lithium producer, with potential to supply up to 5% of global demand by 2030.

Will Zimbabwe supply 5% of global lithium demand by 2030?

Industry analysts at Benchmark Mineral Intelligence project that Zimbabwe could supply up to 5% of global lithium demand by 2030 if processing capacity development remains on track—making the country an increasingly important player in critical energy transition materials. How Will Global Supply Chains Be Affected?
